**Infosys opens 'Power' programme offering freshers up to Rs 9 lakh a year**

This is substantially higher than the entry-level fresher pay packages of Rs 3-3.5 lakh offered by the Bengaluru-based company.

"The focus of these categories of hiring is on coding and software challenges, programming skill testing and other specialised skill tests for both tests and interviews," one of the sources said. "For Infosys, these pay packages offered are between Rs 4-6.5 lakh and Rs 9 lakh."

## Apple Intelligence rolling out to iOS 18.1: How to download, eligibility, features, more

Apple has finally released Apple Intelligence in the beta phase. On Monday, the company rolled out iOS 18.1 beta for developers to test the brand-new features, powered by Apple Intelligence. Along with iOS 18.1, Apple has also released the same updates for iPad 18.1 beta and macOS 18.1 beta. After the release, Apple CEO Tim Cook took to X (formerly Twitter), saying that Apple Intelligence is going to bring a number of new possibilities for users. "It's thrilling to see our developers begin to build with it," he added. Apple spoke about Apple Intelligence during WWDC 2024.

LinkedIn adds support for 10 new languages including Bengali, Marathi, Punjabi and Telugu

LinkedIn says India is its second largest and fastest growing market. Microsoft owned social media platform LinkedIn recently announced that it is adding 10 new language options, which includes support for 4 Indian languages.

The newly added languages include Vietnamese, Persian, Greek, Hebrew, Finnish and Hungarian while the new Indian languages are Bengali, Marathi, Punjabi and Telugu. For those wondering, LinkedIn already supports Hindi, bringing the total number of supported Indian languages on the platform to five.

**Meta content moderation vendors hit by global cyber outage**

Like most social media companies, Meta relies on a mix of artificial intelligence and human review to moderate the billions of posts made to its platforms, which also include Instagram, WhatsApp and Threads. Some of that human review is performed by Meta staffers, but most is outsourced to business services vendors employing armies of low-paid workers who assess whether the posts contain hate speech, violence and outsourced to business services vendors employing armies of low-paid workers who assess whether the posts contain hate speech, violence and other violations of the company's rules. Friday's alert involved vendor access to two of the systems Meta uses to route content flagged for review to moderators, called SRT and HumanOps, the source told Reuters.

## IT firm UST to add over 3,000 jobs in Kochi centre

IT services firm UST said on Monday that it is expanding its presence in India by adding more than 3,000 new jobs at its upcoming Kochi campus in the next five years. It has set a target of 6,000 employees, up from the current level of 2,800, in the next five years at the centre. The firm will inaugurate its second campus in Kochi by December 2027, it said in a statement. The company laid the foundation stone for the new Kochi campus that is coming up on a 9-acre land at Infopark Kochi Phase 2 and the new UST campus will be completed in three years.

## TESLA FINALLY WARNS EV OWNERS NOT TO ATTEMPT THE WET TOWEL CHARGING TRICK

Tesla owners have been officially warned off using the famed wet towel trick. It only took the automaker two months to make the announcement. The trick, in case you don't know, involves dampening a towel and then wrapping it around a Tesla Supercharger handle. This cools down the handle on hot days and allegedly allows the car to charge faster since it doesn't heat up as much as it would in open air.

## Disney sees AI helping to personalize new ESPN app

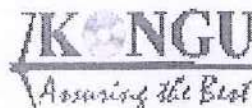

The Walt Disney Company is leveraging artificial intelligence (AI) to enhance the user experience on its new ESPN app, set to launch soon. By harnessing the power of AI, Disney aims to personalize the app for each user, offering tailored content, recommendations, and notifications based on individual preferences and viewing habits. This innovative approach will enable ESPN to deliver a more engaging and dynamic experience, with users receiving relevant scores, news, and highlights that align with their interests. By integrating AI-driven personalization, Disney is poised to revolutionize the way sports fans consume content, setting a new standard for the industry and driving user engagement to new heights.

### Apple reduces iPhone prices in India, here are all the new prices

iPhone sales fell on account of a sales decline in its Greater **China region**, which includes Mainland China, Taiwan, Singapore, and Hong Kong, where sales slid 8% year-on-year, due to strong competition from Huawei, according to analysts. Apple chief financial officer, Luca Maestri added that the company also set a six-month revenue record in India, among other **emerging markets**. "We were particularly pleased with our strong momentum in emerging markets, as we set first-half revenue records in several countries and regions including Latin America, the Middle East, India, Indonesia, the Philippines, and Turkey," Maestri said. Cook said that Apple is producing iPhone in India to stay competitive, and the company's growth in the India market is linked to its operational expansion. "From a pragmatic point of view, you need to produce there to be competitive, and so, yes, the two things are linked from that point of view, but we have both operational things going on and we have go to market and initiatives going on," the executive said. He said Apple sees enormous opportunities from the India market, after opening two stores last year. Apple continues to expand its channels and is also working with the developer ecosystem, resulting in a rapid growth in the base of developers.

## News Corp would have lost \$9 million in 2017 by ditching Google ads, ex-exec testifies Boards

News Corp in 2017 estimated losing at least \$9 million in ad revenue that year if it had switched away from Google's massive advertising apparatus, keeping the media conglomerate captive to the Big Tech company, a former News Corp executive testified on Tuesday

NewsCorp documents shown at trial estimated that in 2016, the publisher made \$83.3 million from ads sold instantaneously through ad tech tools. More than half of those transactions went through Google's ad exchange, with \$18.4 million from Google ads advertisers.

**PROMPT ENGINEERS WANTED TECH COMPANIES HUNT FOR PEOPLE WHO SPEAK THE AI LANGUAGE :**

The demand for AI prompt engineers has gone up by 300% on a year-on-year basis. This comes on the back of rapid adoption of generative AI technologies such as ChatGPT, DALL-E, and other large language models (LLMs),” said Jaideep Kewalramani, COO at TeamLease Edtech. In the last six months alone, 18,000-22,000 new roles were created in the segment according to hiring firm TeamLease. Typically, college graduates with basic English language proficiency are bagging entry level jobs, while engineers with AI and machine learning certification can demand compensation of around Rs 20 lakh annually, recruiters said. At the entry level, prompt engineers could be paid around Rs 4 lakh per annum, they added.

Microsoft has been rocked by a sophisticated cyberattack orchestrated by a Russian state-sponsored hacking group known as Midnight Blizzard. The breach, disclosed by the tech giant on Friday, saw the infiltration of email accounts belonging to senior leaders within the company, marking a significant escalation in cyber threats against major corporations.

According to statements from the Microsoft Security Response Center, the attack was identified on January 12, 2024, prompting an immediate response to mitigate the threat.
